

Two liner transfer tape (Transtick®) used for the making of an integral label or a label on press. The base liner is a 4.6 mil laser liner. The base liner is laser and press printable. The 4.6 mil laser liner will also be less likely to fracture in production if that becomes an issue. The lay-flat liner can also increase run speeds on the applicator. The adhesive is a general purpose perm with high shear. The high shear makes this product laser friendly and easy to die cut.

SL1055 42# SCK Liner - Very Easy Release
