

# CCTWY175

This is a 7 mil white laser Tag laminated to a 20# white bond paper with full gum microsphere adhesive. This product can be die-cut cleanly and be adhesive free once removed. The tag is extremely durable and heat resistant. With no perfs needed, the tag will not tear when being removed from the base sheet. The base sheet is also laser and press printable. The tag stock is compatible with flexo, laser, and thermal transfer printing.

**CCTS176 7.5 mil white Tag stock for flexo and laser printing.**

**EWS101 20# white bond/microsphere adhesive, self wound**
