

CCWY126

This is a 5 mil gloss white PET laminated to a 20# white bond paper with full gum microsphere adhesive. This product can be die-cut cleanly and be adhesive free once removed. The adhesive stays with the 20# bond. The polyester is extremely durable. With no perms needed, the PET will not tear. The 20# base sheet is laser and press printable. The white PET is flexo and thermal transfer printable. The white PET film is suitable for both direct and indirect food contact.

PETWP126 5 mil Bright White PET Chem Treat Two Sides

EWS100 20# white bond/microsphere adhesive, self wound
