

CCXS250

This bright white 10 mil PET with digital matte laser top coat on one side is ideal for high quality print. The primer coat on other side allows for flexo printing or adhesive coating on the back side. This sheet can also be printed on a UV forms press and die cut to make all plastic ID cards, hang tags, or key fobs. It is laser compatible, heat resistant, and water resistant. Our matte laser X coating is scratch resistant and very durable. 2 mil to 10 mil available upon request.

TC50123 Premium Matte Laser Top Coat
