

CCXWY175

This is a 7 mil matte white laser PET laminated to a 20# white bond paper with full gum microsphere adhesive. This product can be die-cut cleanly and be adhesive free once removed. The polyester is extremely durable, water resistant, and heat resistant. With no perfs needed, the PET will not tear. The base sheet is also laser and press printable. The matte laser top coat is compatible with flexo, laser, UV Ink Jet, and thermal transfer printing.

TC50123 Premium Matte Laser and UV Inkjet Top Coat

PETWP176 700 gauge White PET film treated both sides
