

# LFWX049

This is a 2 mil bright white polyester film with a digital matte laser coating on the face. The adhesive is a “shelf” that is ideal when the label is applied to a shelf or racking. The liner is a 92# PK lay flat laser sheet. This product is laser compatible, heat resistant, and water resistant. The digital top coat works well with IGEN, Nexpress, and other color lasers. This product is designed to produce long lasting durable laser labels that can be removed cleanly from shelving or other smooth surfaces.
