

LPPWD075

This is a 3 mil white matte polypropylene with a clay coated surface for excellent print-ability. The face can be printed via flexo, offset, screen, thermal transfer, and UV inkjet. The adhesive is a high tack perm. Applications include drum labels. This is an excellent choice for the most difficult label applications. The liner is a 42# sck 2.5 mil base designed for high speed die cutting and application.
