

# LPPWPQ058

This is a 2.3 mil white BOPP film. The 614 adhesive is a laser safe mid tack removable. The adhesive can be applied in temperatures as low as -10 degrees celcius. The adhesive can be removed clean from glass and other smooth surfaces. The liner is a 40# sck base ideal for high speed die cutting. The face stock is durable, water resistant, and tear resistant. The adhesive can be pattern coated for custom applications.
