

LVQ075

This is a 3.0 mil clear gloss vinyl film. The adhesive is a laser safe mid tack removable adhesive. The adhesive can be applied in temperatures as low as -10 degrees celcius. The liner is a 3.4 mil clay coated base. The face stock is very durable, water resistant, and tear resistant. The liner is printable via flexo, offset, and even some laser. The clay coat allows for optimal feeding inside production digital equipment. Lay flat should be tested when digital printing.

PVC075 3 mil clear gloss vinyl

TC50614 #614 (Q) – Mid-tack removable adhesive that is blood bag compliant, direct food, and skin safe. Excellent for shelf markers.
