

OLDH050

This is a two mil clear uncoated PET with a high bond durable solvent replacement acrylic adhesive. The adhesive works well on both high energy and low energy surfaces. A pattern dry edge is recommended to avoid adhesive build up on press. Ideal for use as an over laminate on a challenging substrate.

SL055 42# SCK Liner - Easy Release

616 High Shear durable adhesive that performs excellent on both high energy and low energy surfaces. This water based acrylic adhesive is an excellent choice when wanting to replace a solvent adhesive.

PET051 2 mil Clear PET Untreated Low TD Shrinkage
