

# OLNCR050

Apply this film to the back of an integral magnet to allow the magnet to be laser compatible. This #50604 adhesive is designed to work with the anti block coating applied on the MC225 magnet. Adding this patch to the integral magnet also improves other processing such as folding and inserting. This protective patch can also be added to the magnet to make an integral magnet on a post card eligible for automatic rates. Check with your local postmaster.

**SL080 50# SCK - Easy Release**

**TC50604 Removable "Cling" Adhesive Low Tack**
