

OLPH050

This is a two mil clear uncoated PET with a high bond rubber based acrylic adhesive. The adhesive works well on both high energy and low energy surfaces. A pattern dry edge is recommended to avoid adhesive build up on press. Ideal for use as an over laminate on a challenging substrate.

SL055 42# SCK Liner - Easy Release

TC210 High Tack Rubber Based Acrylic Adhesive

PET051 2 mil Clear PET Untreated Low TD Shrinkage
