

# PETMETP052

This is a 2.0 mil chem treated PET with a silver metalized coating one side. This film is ideal for use in production of metalized PET labels. Add the adhesive of your choice to the metalized side. The chem treat allows for flexo printing and/or thermal transfer printing on the face of the label.

**PETMETP052 This is a 2.0 mil clear PET chem treated with a 2.2 optical density silver metalized back.**
