

TFDLE3037

Two liner transfer tape used to add adhesive to the substrate of your choice. Print on to the face and back of a window decal and then laminate adhesive over the print. Laminate the adhesive to the printed side of a clear film to protect the print from UV rays and/or other exposures. The clear liner is ideal when showing off high color prime labels. The #50610 perm is a high shear low flow adhesive ideal for drum labels or other outdoor applications. The clear base liner has a satin top coat to allow for press or laser printing.

- SL01055 42# SCK Liner Premium Easy Release
- TC50610 Perm Outdoor Drum Label Adhesive
- SLF3037 1.5 CPET with silicone - easy release
- TC50118 Satin Desk Top Laser Top Coating
