

TS047

Transtick™ Lite two liner transfer tape. Ideal for label/form combinations. Laser applications work well as the extra thickness is minimal. The liner is also moisture controlled to allow for large patches to be used. The coated sheet allows for press printing and/or laser printing on to the patch. Feeding large patches is not a problem with this premium liner. This adhesive is a mid-tack removable from smooth surfaces such as shelves and glass.

SL1056A 42# ultra easy clay coated Liner (Release 5g - 30g, 1" Tesa Tape at 180° 300ipm) Silicone coated one side

TC50611 #611 Mid-tack removable adhesive. Ideal for shelf markers or label applications removing from clean smooth surfaces.

SL048a 2.1 mil lay flat laser liner with Tight Release (50g to 140g,) This liner is both flexo printable and laser printable.
