

TSECB065

Two liner transfer tape (Transtick®) used for making an integral label or a label on press. The base liner is laser and press printable and will also be less likely to fracture in production. The base liner is CB coated as well, to work with multi-part carbonless forms. The lay-flat liner can also increase run speeds on the applicator. The adhesive is rated for outdoor use and/or BS5609 compliant applications. Ideal for test tube applications or other tough labeling applications.

- SL1055 42# SCK Liner - Very Easy Release
- TC50610 Perm Outdoor Drum Label Adhesive
- SL10040A 2.5 Mil Clay Coated Tight Release Laser Liner
- TC50901 CB Black Top Coating
