

TSLLO37

This product is designed for window decals. The patch is applied to the face of the form. The decal is then die cut from the back. A second die cut is made on the face through the patch material only. The laser top coating allows for imaging inside the second die cut area. When the decal is pulled out of the form the imaged area will be removed with it. This process may be used when making integral labels under US Process Patent # 6,068,037.

- SL1055 42# SCK Liner - Very Easy Release
- TC50601 #601 General Purpose Perm Adhesive
- SLFT037 1.5 mil CPET with silicone - tight release
- TC50118 Satin Desk Top Laser Top Coating
