

TTEE040

Two liner transfer tape used for the making of a label on press. The base liner is an easy release 40# sck. The waste liner is an ultra easy silicone formulation to insure you can release the waste liner from the base liner without any adhesive confusion. The adhesive is rated for outdoor use and/or BS5609 compliant applications. Applications also include tough labeling applications such as glass test tubes. This adhesive is also skin safe.
