

Release Liners for Hot Melt Adhesives

Strata-Tac's Hot Melt Liners are designed to stay flat after hot melt adhesive is applied. Applications include integrated labels, envelopes, and more. We can slit to a custom width and length for your application. Untrimmed masters are also available.

Product Code	Weight (#)	Caliper (mils)	Target Release (g/in.)	Master Roll
SL025	25	1.9	35	54"
SL026	21.5	1.65	25	52"
SL027(A)	24	1.9	5	54" (52")
SL3040A	35	2.5	10-50	52"
SL040	35	2.5	15-50	60"

Recommendations:

- Thinner caliper liners can be more challenging to use on a patch applicator, as the patch may want to fracture instead of cutting cleanly. Be sure to use a hard steel cut off blade.
- Actual release levels are dependent on adhesive, substrate, peel angle and speed, application temperature, and more. Testing is highly recommended.
