

Antimicrobial Overlaminates for Labels & Common Surfaces

Strata-Tac's NEW LAMC025 Antimicrobial Overlam:

A long-lasting solution utilizing silver antimicrobial technology which continuously inhibits the growth of bacteria, mildew and fungi. This technology provides naturally safe and effective antimicrobial solutions to combat microbial growth.

- Less toxic than table salt, less irritating than talcum powder
- Comprised of naturally occurring silver ions and ceramic compound (zeolite)
- Abrasion and scratch resistant
- Chemical and heat resistant

LAMC025, 1mil clear PET with our #620 adhesive, can be used to protect surfaces your customers come in contact with.

- Food Packaging, Prime Labels, Medical Packaging, Touch Screens, Switches, Appliances and many more

Use this overlaminates on:

- Menus - Table Tents - Gas Pump Touch Screens -
- Door Handles - Cooler Doors - Credit Card Readers
- ATM Screens - Shared Condiment Bottles - Hotel Door Hangers
- And so much more!

Combine our antimicrobial overlaminates with a variety of films to create labels and surface protection.

- Polyester film from 2mil to 10mil
- Polypropylene from 2mil to 8mil
- Plus a variety of vinyl and synthetics

For labels going into food service or medical use we have the right adhesive.

- Permanent and removable adhesives for direct and indirect Food contact
- For medical applications we have adhesives that are blood bag compliant and skin safe
